

The difference of ACI

Activities in ACI

BY DURU KOÇAK

As every school does, ACI teaches us the important surviving skills in normal life and information about everything we need to know. We learn lessons, do projects and worksheets, but ACI is more than just a regular school. It has millions of clubs and activities that gives everyone the opportunity to find their own ability.

Recently we had a sports day where every sports team in our school participated. They played matches throughout the day and 'us' the non-players enjoyed their matches. Classes from prep to grade 11 all cheered for their teams. The other activity we had was Bazaar Day, it is a traditional event that only the students organize. Thousands of people from

our school and outside our school come to this event where delicious foods are sold, fashion shows are arranged and all kinds of activities are done. This is an event every student in our school work together to create. We also watched 'Moods' at the start of the year. It was also an event arranged by student excluding the prep year. Moods was mostly a show where we get to watch or join dances and songs the students create.

As you can see our school hosts lot's of activities throughout the year and these are only a small amount of them. We have other events about science

and art exhibitions too. This shows us that ACI is not an ordinary school you can find everywhere. And every day we spent in it is a new opportunity for us to find out new things and not only learn but experience everything about life.
